TOOLS

HTML · CSS · JavaScript · Microsoft Excel · UI/UX · SEO

Haitham Al-Kamel

Software Developer · Software Engineering Student

PROFILE

Software Developer based in Istanbul and Software Engineering student at Nişantaşı University. I design and develop modern websites, web-based systems and data solutions that are clean, fast and built to grow. Alongside programming, I bring practical strengths in data and accounts management, administration and organization, and Microsoft Excel. I approach every task with analytical thinking: breaking problems down, understanding the real need, and delivering solutions that are simple to use and easy to maintain.

EDUCATION

Software Engineering

Nişantaşı University — Istanbul, Türkiye

Studying the principles of software engineering, including programming, software design and development, and building reliable software systems.

EXPERIENCE

Software & Web Development

Personal & academic projects

- Designing and developing websites and web interfaces
- Building web-based systems and tools
- Writing clean, organized and maintainable code

Data & Accounts Management

Microsoft Excel · Data organization

- Organizing and maintaining data and accounts
- Preparing spreadsheets and reports in Excel
- Ensuring accuracy and consistency of records

Personal Portfolio Website

Project · HTML, CSS, JavaScript

- Multilingual (English / Arabic / Turkish) site with light & dark themes and interactive 3D graphics
- Responsive layout, working contact form and SEO optimization
